The following guide is intended to walk a user through setting a custom homepage on a Samsung LFD with an onboard web browser. You will require the IR remote control, and a USB keyboard is recommended as well, but not required.

- 1. Power on the LFD.
- 2. Press **SOURCE** on the IR remote control to bring up the Source Menu.
- 3. Use the **LEFT** and **RIGHT** arrow keys to highlight **WEB BROWSER** from the Source Menu as shown below.

10. Once the address has been entered, select **DONE** in the on-screen keyboard (located in the right-hand column, second from the bottom).

- 11. The keyboard will close automatically, and using the arrow keys, navigate to the **CLOSE** menu option in the lower right corner of the Refresh Options menu. Press **ENTER** on the IR remote to close the menu.
- 12. Now, we can launch the web browser. The **WEB BROWSER** option on the Source menu should be already highlighted. Press **ENTER** on the IR remote to launch it.

13. Your page will load automatically. The LFD will stay on the Web Browser input even after power off, unless changed by the user.
